

Statement explaining CPNI procedures

EB Docket 06-36

Tanager Telecommunications, LLC.

Form 499 Filer ID: 825519

For calendar year 2017:

Tanager Telecommunications, LLC. is a reseller of telecommunications services purchased from vendors such as TWtelecom. All of our customers are governmental agencies, where projects are awarded through the public bid process or through the E-Rate system. Therefore, Tanager performs marketing primarily through federal, state and local government public bid processes. Our company follows the rules for each bid, which ensure fairness for each bidder.

We simply do not use customers' CPNI (or other private customer information) in marketing or otherwise, nor do we sell or give private customer information or CPNI to third parties. We do not market our services directly to customers.

Tanager does not have regular access to CPNI. The primary business of Tanager is providing local services and wide area network data networks for large government accounts. We do not currently provide long distance service.

All private customer information is kept secure. Security practices are maintained in compliance with federal government encryption standards and in accordance with the terms of our contracts with the government.

Annually and more often if needed, we provide training of employees and sub-contractors, performed through a company meeting and emails, describing the process we employ for maintaining the security of customer information. Employees and subcontractors who fail to comply are subject to disciplinary action.

I, Brian Adams, manager of Tanager Telecommunications, LLC., declare under penalty of perjury that the foregoing is true and correct.

Brian Adams
Manager,
Tanager Telecommunications, LLC.
